Fessage A File Sharing System

BSSE Semester 5 Web Engineering Project

Instructor Information

Instructor	Student Name	Student Name
Ihtesham Hussain	Jaysh Muhammad 12148	Muhammad Aaraif Hanif 12837

General Information

Description

In This Website, the user will be able to store file so that he or she can access it from another device or can share a link to send a file to someone else

Expectations and Goals

Expectations are high for this system. After completion, the system is expected to store a file that the user will upload and create a shareable link to that file so that it can be accessed from other devices of the same user or he can share the link with somebody else and they can access the file from anywhere in the world.

System Requirements

Admin
